

Clinpro-5000 or Prevident 5000

Why did we recommend Clinpro-5000?

- Clinpro 5000 strengthens teeth and helps to repair early reversible cavities
- Promotes remineralization of tooth structure throughout the tooth
- Creates acid-resistant mineral inside the tooth
- Contains 1.1% NaF (5000ppm Fluoride ion) and an innovative calcium and phosphate ingredient

Recommended Instructions For Use

- Use once daily (evening preferred) instead of your regular toothpaste
- Apply a thin ribbon or pea-sized amount of Clinpro 5000 Anti-Cavity Toothpaste using a soft-bristled toothbrush and brush teeth for at least two minutes
- After brushing, spit excess toothpaste. **DO NOT RINSE YOUR MOUTH.**
- Avoid rinsing or swishing with water following use.

** Children 6 to 16 years of age should spit and rinse their mouth thoroughly with water.**
